

$$\angle 1 - \angle 2 = 102^\circ$$

$$\angle 1 + \angle 2 = 180^\circ \quad (\text{T.K. Odnosmerennye}).$$

$$\angle 1 = 180^\circ - \angle 2 \quad 180^\circ - \angle 2 - \angle 2 = 102$$

$$\angle 1 = 180^\circ - 39^\circ = 141^\circ \quad \angle 2 = 39^\circ$$

$$\angle 5 = \angle 6 \quad \angle 1 = \angle 3$$

$$\angle 7 = \angle 8 \quad \angle 2 = \angle 4$$

T.K. *bernatskennye*

$$\angle 5 = \angle 1$$

$$\angle 6 = \angle 3$$

T.K. *sovetennatskennye*.

Outen:

$$\angle 5 = \angle 1 = \angle 3 = \angle 6 = 141^\circ$$

$$\angle 2 = \angle 4 = \angle 7 = \angle 8 = 39^\circ$$
